### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION*****Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1,4 rejected under 35 U.S.C. 102(b) as being anticipated by Miyazawa et al., patent no. 6,784,312.

In the patent teaches a photoresist composition comprising a resin and a photoacid generator.

The resin is a homopolymer of the following compound (section 64).

3. Claims 1,4,9 are rejected under 35 U.S.C. 102(e) as being anticipated by Mizutani et al., US publication no. US2004/0005512 A1.

The patent teaches a positive working resist composition comprising a copolymer F-5. The norbornyl ring has a hydroxyl group but in section 266 the hydroxyl group norbornyl ring is equivalent to the unsubstituted norbornyl ring and thus anticipates the use of this compound.

The resist also has a PAG and an organic basic compound which is an acid diffusion controller (sec 543-544).

**Allowable Subject Matter**

4. Claims 2,3,5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. The following is a statement of reasons for the indication of allowable subject matter: The polymer does not have other monomers as taught in the claims.
